A Note About Mounting Stamps

I designed all the stamps boxes to show around the stamp mount. In order to do that, I assume the following:

For singles that have pre-cut sizes from Showgard/Schaufix and Scott/Prinz, I assume you will use those.

If you are cutting your own mounts from strips, I used the mount size recommended on Showgard's web site. The mounts should be cut 6mm wider than the width of the stamp (or se-tenant.) This puts the stamp nicely right in the middle of the mount.

For most booklet stamps, I used a mount that was 1 mm higher than the recommended size, because of the extra thickness of the backing paper. There should be screen shots on stamphacks.com showing my stamps mounted on the pages. Coil stamps with backing paper that extended above the stamp, I used 30mm mounts on them.

Appreciation

These stamp pages will always be free. If you have a dying need to show me your appreciation for these pages, glance through the page scans on stamphacks.com and consider donating any stamps that I am missing.

THANK YOU!

I would like to thank all the members of stampbears.com and stampcommunity.org for their feedback and suggestions in helping design this supplement! Making the rest of these supplements could take a while, but with their help, I'm sure it will get done.

Technical

These pages were designed using the excellent **Scribus Open Source desktop publishing app**:
